

■ Vaibhav Sable — Comprehensive Portfolio

Knowledge Base for Noupe AI

This document serves as the master knowledge base for **Vaibhav Sable**, AI Engineer & Full-Stack GenAI Developer. It contains complete, structured details about his professional background, contact details, technical expertise, work experience, competitive programming achievements, verified certifications, and all 34 projects.

■ Personal Information & Bio

- **Name:** Vaibhav Sable
- **Role / Title:** AI Engineer | Generative AI & Agentic AI Specialist
- **Location:** Pune, Maharashtra, India
- **Email:** vaibhavsable150@gmail.com
- **Phone:** +91 9373012758
- **GitHub:** github.com/Vaibhavsable451
- **LeetCode:** leetcode.com/u/vaibhavsable122
- **Codeforces:** codeforces.com/profile/vaibhavsable150
- **CodeChef:** codechef.com/users/vaibhavsable

Summary

Vaibhav Sable is an AI Engineer specializing in **Large Language Models (LLMs)**, **Generative AI**, **Agentic AI Systems**, **Retrieval-Augmented Generation (RAG)**, and **AI Workflow Automation**. He combines strong backend engineering (Python, FastAPI, Java, Spring Boot) with multi-agent frameworks (LangChain, LangGraph, n8n, CrewAI) and vector databases (Pinecone, FAISS) to build production-ready, scalable AI solutions.

■ Technical Skills & Expertise

1. AI & Generative AI

- Generative AI, Large Language Models (LLMs), Prompt Engineering, AI Agents, Agentic AI, Multi-Agent Systems, Tool Calling / Function Calling, RAG (Retrieval-Augmented Generation), AI Workflows, LLM Application Development, AI Automation.

2. AI Frameworks & Orchestration

- LangChain, LangGraph, CrewAI, AutoGen, LlamaIndex, n8n, Model Context Protocol (MCP).

3. RAG & Knowledge Systems

- Pinecone, FAISS, Vector Databases, Embeddings, Semantic Search, Hybrid Search, Document Processing, Chunking & Retrieval, Reranking, Knowledge Bases.

4. Machine Learning & Data Science

- Machine Learning, Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Data Preprocessing, Pandas, NumPy, Scikit-learn, Statistics.

5. Programming Languages

- Python, Java, JavaScript, TypeScript, SQL.

6. Backend & APIs

- FastAPI, Flask, Spring Boot, REST APIs, Microservices, SQLAlchemy, JWT Authentication, OAuth2, API Integration.

7. Databases

- PostgreSQL, MySQL, MongoDB, Redis, SQL, NoSQL.

8. Cloud & DevOps

- AWS (EC2, S3, IAM), GCP, Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins.

9. MLOps & AI Operations

- MLflow, Model Tracking, Model Deployment, Model Monitoring, AI Observability, Prometheus, Grafana.

10. AI Evaluation & Reliability

- AI Evaluation (RAGAS, LangSmith), LLM Evaluation, RAG Evaluation, Prompt Evaluation, Hallucination Detection, Guardrails, AI Safety, Confidence Scoring, Human-in-the-Loop, AI Monitoring, Tracing & Observability.

11. Developer Tools

- Git, GitHub, Postman, VS Code, IntelliJ IDEA, Jupyter Notebook, Linux.
-

■ Professional Experience

1. Data Science Intern — Internship Studio

- **Duration:** Jun 2025 – Dec 2025 (Remote)
- **Highlights:**
 - Designed and implemented data pipelines that improved data processing efficiency by 25%.
 - Conducted exploratory data analysis (EDA), data cleaning, duplicate removal, date-time processing, aggregation, and feature engineering for COVID-19 global data.
 - Built comprehensive data visualizations (histograms, scatter plots, pair plots, bar charts) using Matplotlib and Seaborn.
- **Skills:** Python, Pandas, NumPy, Matplotlib, Seaborn, Data Analysis, EDA, Machine Learning, Power BI, SQL, Statistics.
- **Certificates:** Internship Certificate, Completion Certificate

2. Java Developer Intern — Profound Edutech Private Limited

- **Duration:** Feb 2025 – Sep 2025 (Pune, Maharashtra, India)
 - **Highlights:**
 - Built production-style full-stack applications using Spring Boot, React, TypeScript, MySQL, MongoDB, and REST APIs.
 - Integrated payment gateways (Stripe, Razorpay) and AI LLM APIs (Google Gemini API, Spring AI).
 - Implemented secure authentication (JWT, Keycloak OAuth2) and event-driven messaging (Apache Kafka).
 - **Skills:** Java, Spring Boot, React, TypeScript, Redux Toolkit, MySQL, MongoDB, REST APIs, JWT, Stripe, Razorpay, Gemini API, Node.js, Spring AI, Kafka, Keycloak.
 - **Certificates:** Java Developer Certificate
-

■ Competitive Programming & Coding Achievements

1. **LeetCode**: 200+ Solved Problems across Data Structures & Algorithms, SQL, Python, and Java. Profile: vaibhavsable122
 2. **Codeforces**: Solved Problem 2250A (Threshold Movement) in Python 3. Profile: vaibhavsable150
 3. **CodeChef**: 41+ Solved Problems, 73% Score in Python Skill Test. Profile: vaibhavsable
-

■ Verified Certifications & Industry Credentials

1. **Google Cloud Gen AI Academy APAC 2026 (Cohort 2)** — Google Cloud & Hack2skill
 2. **Generative AI in Software Development** — Amazon / Coursera Specialization
 3. **Full Stack Java Development** — Profound Edutech / Simplilearn
 4. **Meta Back-End Developer Certificate** — Meta / Coursera
 5. **Meta Front-End Developer Certificate** — Meta / Coursera
 6. **Google Data Analytics Certificate** — Google / Coursera
 7. **AWS Cloud Fundamentals** — Amazon Web Services
 8. **MERN Stack Specialization** — Coursera / Udemy
 9. **Introduction to MongoDB** — MongoDB University
 10. **Software Engineer Certification** — HackerRank
 11. **AI & ML Virtual Internship** — AICTE & Industry Partner
 12. **Cloud Virtual Internship** — AWS & AICTE
-

■ Complete Project Portfolio (34 Projects)

1. AegisAI — Enterprise AI Governance & Agentic RAG Platform

- **Description**: Enterprise-grade Agentic AI governance and RAG platform with multi-agent query routing, semantic document retrieval, PII redaction, prompt-injection detection, policy enforcement, hallucination detection, explainable risk scoring, JWT/RBAC, and MLOps tracking.
- **Tech Stack**: Python, FastAPI, LangGraph, LangChain, Groq Llama 3, Pinecone, Sentence Transformers, MySQL, SQLAlchemy, Presidio, MLflow, Docker, Kubernetes, GitHub Actions, AWS EC2.
- **GitHub**: github.com/Vaibhavsable451/AegisAI-Enterprise-AI-Governance-Agentic-RAG-Platform

2. AI Customer Support Agent Platform

- **Description**: Enterprise multi-agent customer support platform featuring intelligent query routing, RAG-powered support agents, automated ticket handling, confidence-based escalation, and MLOps tracking.
- **Tech Stack**: Python, FastAPI, LangGraph, LangChain, Groq Llama 3, Pinecone, PostgreSQL, SQLAlchemy, MLflow, Docker, Kubernetes, GitHub Actions, Prometheus, Grafana.
- **GitHub**: github.com/Vaibhavsable451/AI-Customer-Support-Command-Center

3. Multi-Agent AI Research System

- **Description**: Multi-agent AI system automating end-to-end research workflows using LangChain and Groq LLMs with web search, extraction, generation, and evaluation.
- **Tech Stack**: Python, LangChain, Groq LLM, Streamlit, BeautifulSoup, Requests.
- **GitHub**: github.com/Vaibhavsable451/Multi-Agent-AI-Research-System
- **Live Demo**: multi-agent-ai-research-system.streamlit.app

4. AI House Price Prediction System

- **Description:** End-to-end ML application predicting house prices using supervised learning, featuring EDA visualizations, real-time predictions, and downloadable reports.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Random Forest, Regression, Streamlit, Plotly.
- **GitHub:** github.com/Vaibhavsable451/ai-house-price-prediction
- **Live Demo:** ai-house-price-prediction.streamlit.app

5. Agentic ATS Resume Generator

- **Description:** AI multi-agent resume generation system tailored to job descriptions using LangGraph, RAG with Pinecone, and Groq LLM with self-correcting ATS scoring.
- **Tech Stack:** Python, LangGraph, LangChain, Groq LLM, FastAPI, Streamlit, Pinecone, RAG, ReportLab.
- **GitHub:** github.com/Vaibhavsable451/Agentic-ATS-Resume-Generator

6. AI Sales Intelligence Agent (29-Node Multi-Agent System)

- **Description:** 29-node n8n multi-agent system automating website analysis, company research, pain point detection, personalized email generation, HTML reports, and Slack alerts.
- **Tech Stack:** n8n, Groq LLaMA 3.3 70B, SerpAPI, HTML5, CSS3, JavaScript, Gmail API, Google Sheets API, Slack API.
- **GitHub:** github.com/Vaibhavsable451/AI-Sales-Intelligence-Agent
- **Live Demo:** resdasales.netlify.app

7. Agentic AI YouTube Summarizer (Multi-Agent System)

- **Description:** Transforms YouTube videos into structured learning content (summaries, notes, Q&A, quizzes) using Groq LLaMA 3.3 70B and LangChain.
- **Tech Stack:** Python, Streamlit, Groq LLaMA 3.3 70B, LangChain, YouTube Transcript API.
- **GitHub:** github.com/Vaibhavsable451/Agentic-AI-YouTube-Summarizer-Multi-Agent-System-

8. ResumeForgeAI – Multi-Agent ATS Resume Builder

- **Description:** Multi-agent platform evaluating job descriptions, GitHub profiles, and resumes to generate recruiter-friendly resumes, ATS score reports, and PDF downloads.
- **Tech Stack:** Python, Streamlit, Groq API, Llama Models, Agentic AI, ATS Optimization, ReportLab.
- **GitHub:** github.com/Vaibhavsable451/ResumeForgeAI-Multi-Agent-ATS-Resume-Builder-
- **Live Demo:** resumeforgeai.streamlit.app

9. Q&A; AI Agent with RAG using n8n

- **Description:** No-code Q&A; system built with n8n, Google Gemini, Pinecone, and Google Drive implementing RAG with conversational memory.
- **Tech Stack:** n8n, Google Gemini, Pinecone, RAG, Vector Embeddings, Google Drive.
- **GitHub:** github.com/Vaibhavsable451/Q-A-AI-Agent-with-RAG-using-n8n-

10. Multi-Agent AI Sales & Support System

- **Description:** Customer engagement platform using a Supervisor Agent to route conversations to specialized Sales and Support AI agents.
- **Tech Stack:** n8n, Groq Llama 3.3 70B, AI Agents, REST APIs, Webhooks.
- **GitHub:** github.com/Vaibhavsable451/multi_agent_sales_support
- **Live Demo:** agentfd.netlify.app

11. Cricket Multi-Agent Factory (Supervisor + 6 AI Agents)

- **Description:** Multi-Agent Cricket Intelligence Platform featuring a Supervisor Agent and 6 specialized agents (Score-X, StatX, Chronos, Pulse, Tactix, Archive) powered by Groq Llama 3.3 70B and SerpAPI.
- **Tech Stack:** n8n, Groq Llama 3.3 70B, SerpAPI, Agentic AI, Multi-Agent Architecture.
- **GitHub:** github.com/Vaibhavsable451/Cricket-Multi-Agent-Factory-Supervisor-6-Agents---Groq-v2

12. Multivendor E-Commerce Platform

- **Description:** Full-stack e-commerce platform with multi-role support (Admin, Seller, User), JWT authentication, Stripe/Razorpay integration, and AI chatbot support.
- **Tech Stack:** Spring Boot, React, TypeScript, Redux Toolkit, MySQL, JWT, Tailwind CSS, Stripe, Razorpay.
- **GitHub:** github.com/Vaibhavsable451/Ecommerce_multivendor
- **Live Demo:** ecommerce-multivendor-1.onrender.com

13. Employee Management System

- **Description:** Full-stack Employee Management System executing complete CRUD operations with Vercel frontend and Render backend deployment.
- **Tech Stack:** Java, Spring Boot, React, MySQL, REST API, Postman.
- **GitHub:** github.com/Vaibhavsable451/Employee-Management-System
- **Live Demo:** employee-management-system-blond-eight.vercel.app

14. AI Resume Match & Job Recommender

- **Description:** Platform analyzing resumes against job descriptions using Spring AI and Groq LLaMA 3 to generate ATS scores, skill gap insights, and cover letters.
- **Tech Stack:** Java, Spring Boot, Spring AI, React, TypeScript, MySQL, Groq LLaMA 3, Tailwind CSS.
- **GitHub:** github.com/Vaibhavsable451/Resume-Anlayzer
- **Live Demo:** resume-anlayzer.onrender.com

15. AI-Powered Fitness App

- **Description:** Full-stack AI-driven fitness app with Spring Boot microservices, Kafka, Keycloak OAuth2, and React for user activity tracking and recommendations.
- **Tech Stack:** Java, Spring Boot, Kafka, Keycloak, OAuth2, React, MongoDB, MySQL.
- **GitHub:** github.com/Vaibhavsable451/AI-Powered-Fitness-App-With-Spring-Boot-Microservices

16. VibeCode Animated AI Website

- **Description:** Cinematic AI-powered animated website using Next.js, Google Gemini, and scroll-based storytelling techniques deployed on Vercel.
- **Tech Stack:** Next.js, JavaScript, CSS, Gemini AI, Google Whisk, Google Flow.
- **GitHub:** github.com/Vaibhavsable451/vibecodeAnimated-Website
- **Live Demo:** vibecode-animated-website.vercel.app

17. Prompt-Driven AI Chatbot Agent

- **Description:** AI chatbot agent using a prompt-driven workflow (Input → AI processing → UI rendering) deployed on Google Opal.
- **Tech Stack:** LLM API Integration, Google Opal Workflow Builder, Prompt-Driven Agent Design.
- **Live Demo:** opal.google/app/1rh-gUMSzigdIN1cU8cNBUsm3q-ePb7BO

18. KairoAI Chatbot

- **Description:** Fast AI-powered chatbot delivering real-time responses using Groq API with OTP authentication, multimodal input (text + image), and voice replies.
- **Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js, Groq API.

- **GitHub:** github.com/Vaibhavsable451/Ai-Chatbot
- **Live Demo:** pl-tawny-one.vercel.app

19. 3D Portfolio Website

- **Description:** Interactive personal portfolio website with 3D-inspired visuals, responsive design, and smooth UI animations.
- **Tech Stack:** HTML5, CSS3, JavaScript.
- **GitHub:** github.com/Vaibhavsable451/3d-Portfolio-Website
- **Live Demo:** 3d-portfolio-website-kappa-kohl.vercel.app

20. AI Recruitment Email Intelligence Agent

- **Description:** Automated n8n workflow classifying recruitment emails from Gmail (interview, selection, rejection, offer) using Groq LLM and logging results in Google Sheets.
- **Tech Stack:** n8n, Groq LLM API, Gmail API, Google Sheets API.
- **GitHub:** github.com/Vaibhavsable451/AI-Recruitment-Email-Intelligence-Agent

21. Tech Release Monitoring Agent – Java & React

- **Description:** Automation system fetching release info for Java and React from public APIs, generating Groq LLM summaries, and emailing developer alerts.
- **Tech Stack:** n8n, Groq LLM API, Gmail API, GitHub API.
- **GitHub:** github.com/Vaibhavsable451/Tech-Release-Email-Agent-Java-React-Groq-AI-n8n-

22. Job Finder AI Agent

- **Description:** Job automation system searching LinkedIn listings, evaluating resume fit via Groq LLM, generating cover letters, and sending Telegram alerts.
- **Tech Stack:** n8n, Groq LLM, Google Sheets, Telegram Bot API.
- **GitHub:** github.com/Vaibhavsable451/Job-Finder-AI-Agent

23. Spring AI Chatbot

- **Description:** Conversational AI application using Spring Boot, Spring AI, React.js, and Groq LLMs deployed on Render.
- **Tech Stack:** Java, Spring Boot, React, Groq API, Spring AI.
- **GitHub:** github.com/Vaibhavsable451/Spring-AI-Build-Generative-AI-application-
- **Live Demo:** aibuisl.vercel.app

24. Job Mail AI Tracker

- **Description:** n8n automation scanning Gmail, classifying emails as Rejection or Applied via Groq LLM, labeling Gmail, and logging to Google Sheets.
- **Tech Stack:** n8n, Groq LLM, Gmail API, Google Sheets.

25. Job Finder AI Agent (Direct Manager Emailer)

- **Description:** Job automation system scraping live listings, matching resume fit via Groq LLM & Gemini, generating cover letters, and emailing hiring managers.
- **Tech Stack:** n8n, Groq LLM, Google Gemini, Gmail API, Google Docs, Apify.

26. Multi-AI Chatbot Agent Platform (Gemini + Groq + OpenRouter)

- **Description:** Multi-LLM chatbot web application routing prompts across Gemini, Groq, and OpenRouter using n8n webhooks.
- **Tech Stack:** HTML5, CSS3, JavaScript, n8n, Webhook API, Google Gemini, Groq LLM, OpenRouter.

- **GitHub:** github.com/Vaibhavsable451/Chatbot
- **Live Demo:** chatbot-nine-phi-24.vercel.app

27. JARVIS – Real-Time AI Personal Assistant

- **Description:** Real-time AI assistant built with Python capable of executing system commands, automating keyboard/mouse actions, and managing persistent memory.
- **Tech Stack:** Python, AsyncIO, OpenAI API, Gemini API, Windows Automation.
- **GitHub:** github.com/Vaibhavsable451/Advanced-Real-Time-AI-Personal-Assistant

28. Dual AI Chat

- **Description:** Multi-model AI chat application enabling side-by-side comparison of responses from Groq Llama 3.3 70B, Google Gemini 2.5 Flash, and GPT-4o mini in real time.
- **Tech Stack:** Groq, Google Gemini, OpenRouter, Llama 3.3 70B, React.
- **Live Demo:** twin-chat-guide.lovable.app

29. COVID-19 Data Analysis Using Python

- **Description:** Exploratory data analysis project analyzing global COVID-19 data using Pandas, NumPy, Matplotlib, and Seaborn.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn, Data Analysis.
- **GitHub:** github.com/Vaibhavsable451/Project-Internship

30. TalentFlow AI – Multi-Agent Recruitment Automation System

- **Description:** Multi-agent AI recruitment automation platform streamlining resume analysis, ATS scoring, candidate search, and recruiter email generation using Gemini, Groq, and Pinecone.
- **Tech Stack:** n8n, Google Gemini, Groq LLM, Pinecone, Webhook API, Gmail API.
- **GitHub:** github.com/Vaibhavsable451/TalentFlow-AI

31. AI Data Science & LLM Studio

- **Description:** End-to-end AI engineering platform integrating data preprocessing, EDA, ML training, PyTorch deep learning, RAG with LangChain/Pinecone, and multi-LLM chatbot.
- **Tech Stack:** Python, Streamlit, Scikit-learn, PyTorch, Pandas, LangChain, Pinecone, Gemini, Groq.
- **GitHub:** github.com/Vaibhavsable451/AI-Data-Science-LLM-Studio
- **Live Demo:** ai-data-science-llm-studio.streamlit.app

32. Veylix — AI-Powered Code Editor

- **Description:** AI-native code editor bringing agentic AI into development workflows (code generation, execution, error analysis, real-time AI streaming, RAG codebase search).
- **Tech Stack:** React, Monaco Editor, FastAPI, Python, WebSockets, LangChain, LangGraph, MCP, RAG, FAISS, Groq, Gemini.
- **GitHub:** github.com/Vaibhavsable451/Ai-Code-Editor
- **Live Demo:** ai-code-editor-frontend.onrender.com

33. AI Finance Assistant Agent

- **Description:** Personal finance automation system built with n8n, Groq, Google Sheets, Gmail, and chat interface for logging expenses, category insights, and email confirmations.
- **Tech Stack:** HTML, CSS, JavaScript, n8n, Groq, Google Sheets, Gmail API.
- **GitHub:** github.com/Vaibhavsable451/FinPassbookAI
- **Live Demo:** fin-passbook-ai.vercel.app

34. Resume Intelligence & ATS Optimizer

- **Description:** AI resume analysis platform evaluating resumes against job descriptions, generating ATS subscores, STAR bullet point rewrites, and job match recommendations.
- **Tech Stack:** HTML, CSS, JavaScript, Python, Groq API, Llama, Qwen, Resume Parsing, Vercel.
- **GitHub:** github.com/Vaibhavsable451/Resume-Intelligence-ATS-Optimizer
- **Live Demo:** resume-intelligence-ats-optimizer-zeta.vercel.app

Created for Vaibhav Sable's Portfolio AI Chatbot Knowledge Base (Noupe AI).
